RESUME

Milad Seyfi

Cloud Architect & DevOps Consultant

LinkedIn

PROFILE

Cloud engineer and DevOps consultant with hands-on experience designing, operating, and modernizing OpenStack, Ceph, and Kubernetes platforms. Work spans multi-datacenter infrastructure, platform automation, observability, service ownership, technical documentation, and mentoring.

100+
OPENSTACK SCALE
compute nodes across multi-datacenter infrastructure

50+ TB
CEPH STORAGE
distributed storage across multiple cluster topologies

60%+
DEPLOYMENT TURNAROUND
improvement from GitOps and CI/CD work

EXPERIENCE

Cloud Engineer
GreenPlus

September 2023 — October 2026
Mashhad · Tabriz · Shiraz · Tehran

Worked across the design, operation, and modernization of highly available OpenStack infrastructure spanning more than 100 compute nodes and multiple datacenter locations.

- Designed, operated, and modernized OpenStack infrastructure across Nova, Neutron, Cinder, Glance, Octavia, and OVN networking.
- Worked with OpenStack-Ansible and Kolla-Ansible, including migration and modernization of legacy cloud environments.
- Designed and operated Ceph and RBD storage with three-node, five-node, and six-node architectures, SSD and NVMe pools, Cinder volume types, and storage QoS.
- Worked on Kubernetes-as-a-Service architecture using Kubernetes, Cluster API, CAPO, Kamaji, FastAPI orchestration, OpenStack project isolation, Octavia, and cluster lifecycle workflows.
- Built infrastructure automation and delivery workflows with Terraform, Ansible, AWX, self-hosted GitLab, GitLab CI, and GitOps practices.
- Worked across Ironic, MAAS, Proxmox, GPU passthrough, image building, L2/L3 networking, VLANs, DHCP relay, and DMZ/private network architecture.
- Supported infrastructure observability with Prometheus, Grafana, and ELK/EFK, alongside service ownership, runbooks, technical documentation, mentoring, and knowledge transfer.

Selected results

- Contributed to OpenStack upgrades across three datacenters and more than three major versions without product downtime.
- GitOps and CI/CD improvements reduced deployment turnaround by more than 60%.
- Participated in launching a new Tebyan cloud environment.

SELECTED PROJECTS

Multi-Datacenter OpenStack Modernization

Controlled modernization of highly available OpenStack infrastructure across multiple locations.

- Worked across more than 100 compute nodes and core OpenStack services.
- Contributed to upgrades across three datacenters and more than three major versions.

Completed the covered upgrades without product downtime.

OpenStack · OVN · OpenStack-Ansible · Kolla-Ansible

Ceph Storage Architecture for OpenStack

Distributed Ceph and RBD storage designed around workload separation, storage tiers, and failure domains.

- Worked with more than 50 TB of distributed Ceph storage.
- Used three-node, five-node, and six-node architectures according to environment requirements.

Ceph · RBD · Cinder · SSD / NVMe

Kubernetes-as-a-Service Platform

Internal platform architecture connecting portal workflows to OpenStack-backed Kubernetes lifecycle management.

- Connected FastAPI orchestration, OpenStack resource preparation, Cluster API, and CAPO.
- Supported configurable cluster creation, scaling, deletion, networking, and load balancing workflows.

Kubernetes · CAPI / CAPO · FastAPI · OpenStack · Octavia

Infrastructure Automation & Operations Platform

Repeatable provisioning and operations through infrastructure as code, managed automation, and GitOps workflows.

- Used Terraform, Ansible, AWX on K3s, self-hosted GitLab, and GitLab CI.
- Integrated runbooks, backup workflows, documentation, and infrastructure observability.

Reduced deployment turnaround by more than 60%.

Terraform · Ansible / AWX · GitLab CI · Prometheus / Grafana

TECHNICAL EXPERTISE

Private Cloud Architecture

OpenStack · Nova · Neutron · Cinder · Glance · Octavia · OVN

Storage Architecture

Ceph · RBD · Cinder volume types · SSD / NVMe pools · Storage QoS

Kubernetes Platforms

Kubernetes · Cluster API · CAPO · Kamaji · Calico · K3s

Automation & Delivery

Terraform · Ansible · AWX · GitLab CI · GitOps · FastAPI

Network & Provisioning

Ironic · MAAS · Proxmox · L2 / L3 · VLAN · DHCP relay

Operations & Ownership

Prometheus · Grafana · ELK / EFK · Runbooks · Mentoring

EDUCATION

Master of Science in Software Engineering

Ferdowsi University of Mashhad
